PROFESSIONAL SUMMARY

Data Analyst & AI Engineer with practical expertise in building real-time dashboards, automating business workflows, and deploying multi-LLM AI systems. Skilled in Python, Power BI, SQL, and AI APIs with experience across ERP analytics, sales intelligence, and supply chain reporting. Experienced in developing scalable analytics solutions and AI-powered business applications for enterprise operations.

PROFESSIONAL EXPERIENCE

VVD & Sons Private Limited | Data Analyst *Chennai, India | Mar 2025 – Present*

- Developed real-time Power BI dashboards for regional sales and operational KPI monitoring, accelerating business decision-making by 40%.
- Automated inventory and logistics reporting workflows using Python and SQL-based ETL pipelines across multiple product categories.
- Conducted Root Cause Analysis (RCA) across 7+ regions, identifying sales gaps and reducing operational bottlenecks — improving team performance by 15%.
- Designed e-commerce tracking modules for SKU performance analysis and high-growth opportunity identification.
- Built Python automation scripts for daily sales reporting, cutting manual Excel work by 90%.

PROJECTS

ERP Analytics Dashboard — Sales, Finance, Supply Chain & Customer Support | 2026

Technologies: Python, Streamlit, SQL, Pandas, Plotly, AG Grid, FTPS, Power BI, DAX, Mail Integration, WhatsApp Integration

- Engineered a unified ERP analytics platform covering Sales, Finance, Supply Chain, and Customer Support with live data ingested via FTPS and SQL ETL pipelines.
- Developed Power BI dashboards with DAX measures for revenue tracking, inventory monitoring, and operational insights.
- Automated daily business summary alerts via Email and WhatsApp, eliminating manual stakeholder reporting.
- Delivered role-based Streamlit dashboards via REST API for executives and operations teams, reducing reporting time by 70%.

Personal AI Chat Assistant — Multi-LLM Routing Engine | 2026

Technologies: Python, OpenAI API, Anthropic Claude API, Groq, FastAPI, HTML, CSS

- Built a web-based Generative AI chat application connecting OpenAI GPT, Claude, and Groq Llama from a single interface via REST API.
- Developed a FastAPI backend implementing intelligent LLM routing based on task requirements — reasoning, summarization, or code generation.
- Designed a clean HTML/CSS frontend with streaming responses, conversation history, and system prompt customization.
- Implemented AI usage cost optimization and rate-limit management per LLM provider for efficient and controlled usage.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, HTML, CSS, Power BI, DAX, Streamlit, FastAPI, Git

Data Libraries: Pandas, NumPy, Plotly, AG Grid, Scikit-learn

AI & LLM: OpenAI API, Anthropic Claude API, Groq, LangChain, Prompt Engineering, Generative AI, Multi-LLM Systems

Data & Analytics: Machine Learning, Deep Learning, NLP, ETL, Data Pipeline, Statistical Analysis, Time-Series Analysis, Predictive Modeling

Integrations: REST API, FTPS, Mail Integration, WhatsApp Integration

Domains: ERP Analytics, Supply Chain, Sales Analytics, Finance Reporting, E-commerce, CRM, Business Intelligence

Cloud & Others: AWS Fundamentals, Tableau, MS Excel, Cloud Computing

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration, Agile Methodology

EDUCATION

Bachelor of Computer Applications (BCA) | 2021 – 2024

Thiruvallur University — CGPA: 6.8 (72%)

- Led a team for a computer science project and seminar.
- Participated in college technical events focused on computer science and IT.

CERTIFICATIONS

- Python, SQL, Power BI & Data Science — 360 DigiTMG (2024)
- TCS iON Young Professional Course (2024)
- Basics of Generative AI — Digital India (2024)
